Podcasts: Talking to neuroscientists

2008-08-20 14:12:00

By Eugene Raikhel

The [Wellcome Trust Centre for the History of Medicine](#) at University College London has put together a nice collection of interviews with four eminent neuroscientists, called [Today's Neuroscience, Tomorrow's History](#), available as transcripts, videos or podcasts. The researchers profiled are [Uta Frith](#), known for her research on autism spectrum disorders; [Richard Gregory](#), who worked for many years on visual perception; child psychiatry researcher [Michael Rutter](#); and neuropsychologist [Elizabeth Warrington](#). These interviews are impressively extensive, in each case covering the neuroscientist's education, influences as well as an in-depth discussion of their areas of research.
